

BUSINESS ADVICE

high finance

Our fast effective teamwork is an integral part of our success in the business services team. We handle a wide range of transactional and non-transactional work and provide solutions tailored to your business needs.

Our approach

Our starting point is always understanding and agreeing your business objectives. Sometimes the input required from us will be minimal. On other occasions major commitments of resource and expertise will be required. Each client and each instruction is equally important.

Our clients range from sole proprietors of unincorporated businesses to multinationals. The services we provide range from preparing or reviewing simple agreements to buying and selling major companies.

We are able to provide a national service standard at rates which reflect our lower regional overheads. Our fee structures are open and transparent and we will agree at the outset with you what they will be in your case.

Our team

The range and depth of our experience enables us to bring together a highly qualified team of legal experts to work with you. Whether you need help with company law, employment issues, dispute resolution or any other legal issues which affect your business, we can fulfil your needs.

Our investment in the people who make up our team has resulted in our handling of a record number of transactions in the last calendar year.

Providing the range of services we offer to our wide client base requires substantial resources in terms of people, expertise and technology. We recruit and retain only the most able lawyers and invest in the best systems to support them.
