

BUSINESS RESTRUCTURING

business restructuring

Businesses of all shapes and sizes go through difficult patches. In our experience it is vital that any business experiencing financial difficulties receives the correct advice as soon as possible after any issue arises. The earlier a potential problem is identified, the wider the range of options available.

Our approach

We are highly committed to the business communities we support throughout our region. We are committed to the great entrepreneurial spirit we see here in the south west. As a result of that commitment, we are able to provide advice with a real aim, if possible, to rescuing any business suffering financial difficulties.

Our expertise

Our highly regarded and experienced restructuring and insolvency team has the specialist ability to advise stakeholders on the full range of options available. We will explore all the available solutions, possibly in conjunction with other restructuring professionals that we regularly work closely with.

Our team can also offer significant expertise in relation to any issues that directors may face in the context of troubled businesses.

You can be assured that whatever situation your business finds itself in, we can provide the specialist advice necessary to deal with the problem in the best, most cost effective way possible.

Our services

Whatever financial difficulties your business may experience, our team offers the expertise necessary to implement the right solution.

We will explore all the possible solutions, looking initially at rescue and turnaround solutions. If a turnaround solution is not feasible, our dedicated insolvency team is able to advise in relation to the various options available using a formal insolvency procedure.

We offer a supportive and confidential service to any business or director, which includes:

- Exploration of turnaround solutions
- Advice on all insolvency procedures
- Advice on directors' duties
- Risk analysis of any potential solution
- Resolution of disputes
- Referral to other restructuring professionals when necessary
- Assessment of impact on employees
- Advice on property related issues
