

PROPERTY LITIGATION

property problems? – we build solutions!

Whether your property is commercial, residential or agricultural, freehold or leasehold, we have the specialist knowledge to advise on all disputes or issues which you may encounter. Whatever your requirement, we will work with you and deliver practical, high quality advice.

We have an experienced team of specialist property litigation lawyers recognised by independent analysts* as one of the leading teams in the south west. We regularly receive recommendations from other lawyers and professionals.

Our approach

We adopt a solution based approach and apply our expert knowledge of the law to resolve disputes as efficiently and cost effectively as possible.

We will work closely with you to understand your circumstances and needs, to listen to your concerns and work in partnership with you and your agents or other professional advisers to find the best solution for you.

Our practical approach allows us to identify the best way of resolving the dispute from the range of options available rather than simply following the route of court proceedings.

Our experience

Our expert lawyers have advised public limited companies, private companies, partnerships, private clients and public authorities and have experience in working with many areas of business and commerce including retail and leisure.
